Founded in 2005 by Nick Friedberg, NSF has earned a loyal following for its clean aesthetic, understated cool and eminently wearable collections. Blending contemporary attitude with the understated softness of its menswear roots, the brand continues to expand and evolve. Men seek NSF for its quiet ease, confident attitude and attention to detail.

A free spirit and hard work. The two things we admire most and the two things that forever entwine the great state of California with the history of denim. Before software, before hip-pies and even before James Dean- jeans represented the California dream. Denim is at the sould of what is means to leave everything behine and head west to reinvent yourself, claim your future and live bravely.
